Bachelor of Technology — Kalinga Institute of Industrial Technology, Bhubaneswar

Education

• Bachelor of Technology in Computer Science and Engineering
Kalinga Institute of Industrial Technology

2022-26

WORK EXPERIENCE

• Intern at Larsen and Toubro Constructions [Minerals and Metals IC]

Aug-Sept2025

Developed optimized SQL procedures, interactive Power BI dashboards, and a complete front-end CRUD system, strengthening my skills in data analytics, web development, and process automation. Gained hands-on experience solving real business problems with clean logic, structured design, and an emphasis on accuracy and usability.

Personal Projects

• Student Performance Predictor – Python

Machine Learning | Scikit-learn | Gradient Boosting

- Developed a Student Performance Predictor using Python and Scikit-learn, achieving 91% prediction consistency through Gradient Boosting Regression and optimized preprocessing pipelines.
- Implemented data preprocessing, feature engineering, categorical encoding, and train-validation-test splitting, improving model efficiency by 35% and reducing prediction error rates.
- Evaluated model performance using MAE, RMSE, and R^2 metrics, ensuring reliable predictions and scalable workflow architecture for academic analytics and early intervention systems.

• MetaDoc Prototype

AI-Powered Decentralized Medical Diagnosis System

- Developed a full-stack healthcare platform integrating React.js Frontend, Node.js Backend, and Ethereum Blockchain for secure diagnosis and record storage.
- Achieved 82% diagnostic accuracy using API-driven and fallback AI algorithms with symptom severity scoring.
- Implemented voice-based interaction (Web Speech API), wallet authentication, and real-time chat with dynamic symptom input.
- Secured patient data through smart contract access control and ensured HIPAA-compliant record handling.
- Contributed to research documentation, created system diagrams, and presented backend logic and architectural design in live demo sessions.

Technical Skills

Languages: C/C++, Python, Javascript, Java, SQL

Frontend : React.js, HTML5, CSS3

Backend : Node.js, Express.js, REST APIs

Libraries/Tools: Git, GitHub, PowerBI, VSCode, Numpy, Pandas, Scikit-Learn

Frameworks: ReactJs

Cloud/Databases : MongoDB , Relational Database(MySql)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Software Engineering, Computer Organisation and Architecture

Soft Skills: Problem Solving, Self-learning, Effective Communication, Presentation, Adaptability

CERTIFICATIONS

- Generative AI: Introduction and Applications (IBM)[coursera]
- Generative AI: Prompt Engineering Basics (IBM)[coursera]
- Prompt Engineering for ChatGPT (Vanderbilt University)[coursera]
